The unique industrial experience of our diverse J.T. Thorpe & Son, Inc. engineering team allows us to provide alternative design options for both installation methods and anchoring types. We are prepared to provide a cost efficient installation approach to any difficult structural geometry or simple structural field joints. We have provided unique reinforced composite solutions for special high-impact needs. No matter how small or large the project, J.T. Thorpe & Son, Inc. is committed to providing a safe and efficient solution. All of our US offices are equipped to handle any field or shop fireproofing needs.

## CASE STUDY

In 2009, J.T. Thorpe & Son, Inc. was asked to perform two Chartek fireproofing projects at Chevron El Segundo, CA. As a certified Chartek installer, J.T. Thorpe & Son, Inc. was able to provide cost efficient solutions to meet the refinery's fireproofing needs. Combined, the two projects accounted for over 10,000 man hours of professional craftsmanship. The J.T. Thorpe & Son, Inc. commitment to Quality and Safety resulted in successful projects completion, on schedule and with zero recordable injuries or first aids.
